Email: akash.saxena1404@gmail.com
Mobile: +91 9634412955

SKILLS

Languages:	C, C++, Python, JavaScript
Frameworks:	Tailwind CSS, React.js, Node.js, Express.js
Databases/ORM:	MySQL, MongoDB
Tools/Platform:	Git, GitHub, Docker, Postman
Soft Skills:	Effective Presentation, Leadership, Team Collaboration, Decision Making

PROJECTS

WorkAxis – Employee Task Management System GitHub	Feb' 26
- Engineered a role-based employee task management platform that streamlines task assignment, deadline tracking, and real-time notifications, enabling managers to efficiently monitor team workflows and improve coordination across departments. - Optimized workflow processes and implemented secure authentication with protected API routes, reducing manual coordination by 40% and improving overall task completion efficiency by 30%. - Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Chart.js, JWT Authentication, REST APIs, MVC Architecture.	
RookieRise – Recruitment and Assessment Platform GitHub	Nov' 25
- Designed a full-stack recruitment platform supporting candidate profiles, job postings, and online assessments, allowing recruiters to manage applications and evaluate candidates through a centralized dashboard. - Integrated online assessments and scalable backend APIs enabling concurrent testing for 30+ candidates, streamlining evaluation workflows and reducing manual recruitment effort by 50%. - Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT Authentication, REST APIs, MVC Architecture.	
LRU Cache Simulator – DSA Project GitHub	Mar' 25
- Implemented a Least Recently Used (LRU) cache simulator demonstrating efficient cache-based memory management using optimized data structures for fast data retrieval operations. - Achieved O(1) time complexity for both insertion and retrieval operations using a combination of HashMap and Doubly Linked List for efficient cache eviction logic. - Tech Stack: C++, HashMap, Doubly Linked List.	

TRAINING

Lovely Professional University	Jun' 25 - Jul' 25
Data Structure and Algorithms	
- Applied Data Structure and Algorithms concepts to design efficient backend logic and optimize data flow. - Optimized algorithms to reduce execution time and significantly enhance user responsiveness. - Used Git and GitHub for version control, collaboration, and maintaining clean, trackable project iterations.	

CERTIFICATES

• Data Structure and Algorithms <i>LPU</i>	Aug' 25
• Cloud Computing <i>NPTEL</i>	May' 25
• Programming Foundations with JavaScript, HTML and CSS Coursera	Jun' 24

ACHIEVEMENTS

• Earned HackerRank badges: 4★ Python (Silver), 3★ SQL (Silver), and 2★ C++ (Bronze).	Nov' 23
---	---------

EDUCATION

Lovely Professional University	Phagwara, Punjab
<i>Bachelor of Technology - Computer Science and Engineering CGPA: 7.25</i>	Aug' 23 – Present
S.S.A Vidhyapeeth	Agra, Uttar Pradesh
<i>Intermediate Percentage: 93</i>	Apr' 21 – Mar' 22
St. George's College	Agra, Uttar Pradesh
<i>Matriculation Percentage: 93</i>	Apr' 19 – Mar' 20
